Summary

Results-driven and **AWS Certified Solutions Architect Associate** with 4 years of experience in cloud operations and support, complemented by hands-on development contributions. Proven ability to troubleshoot complex issues, optimize cloud infrastructure for performance and cost-efficiency, and contribute to the development of robust, scalable AWS solutions. Adept at leveraging a broad range of AWS services to ensure system reliability and security, and committed to continuous learning and applying best practices in a dynamic cloud environment.

Skills

- AWS ,Cloud Computing ,Cloud Watch, Lambda , EC2, Step Functions, S3, Linux , Load Balancing, Code Commit, Code Build, Code Pipeline, Code Deploy, Docker, CI/CD .
- GIT , JIRA, Agile ,Service Now, Production Support , Shell Script , Problem Solving.
- Incident Management, Change Management , Documentation, Troubleshooting , Power Automate, Natural Adabas.

Experience

System Engineer

TCS

Hyderabad

March 2023 – Present

- Implemented a Power Automate flow to proactively notify Teams channels of AWS Step Functions failures, enhancing operational visibility and decreasing incident detection time by approximately **80%**
- Provided production support for insurance applications migrated to AWS, ensuring high reliability and minimal operational issues
- Created and maintained comprehensive documentation on application workflows and AWS architecture, enhancing team knowledge and support processes
- Proactively developed and maintained a library of SOPs to ensure efficient and consistent AWS operations.
- Monitored overnight batch jobs on AWS services, ensuring smooth execution and resolving issues proactively.
- Leveraged AWS CloudWatch, Grafana, and Kibana to troubleshoot issues and maintain the availability of critical applications.
- Hands-on experience in Branching, Merging, Tagging, Versioning and Maintaining code across multiple environments using version control tools like GIT
- Created Bash, shell scripts for various Systems Administration tasks to automate repeated processes.
- Worked with developers for resolving runtime failures, troubleshoot Build and Deployment issues with minimal downtime.
- Integrated GIT into Code Commit to automate the code check-out process and Used AWS Code Build for automating builds and automating deployments.
- knowledge on S3 Versioning and life cycle policies and cross region replication of S3 buckets.

Application Development Associate

Accenture

Hyderabad

Jan 2021 – March 2023

- Actively monitored AWS applications and resolved incidents through CloudWatch, Grafana, and Kibana.
- Managed critical updates in Amazon S3, such as changing store addresses for seamless routing and user operations
- Collaborated across teams to ensure efficient incident management and support processes, reducing downtime and improving system availability and resolved 98% of the incidents within SLA
- Supported and maintained applications in Mainframe Natural Adabas and AWS environments

- Developed a solution to identify and prevent duplicate orders, improving order accuracy and customer satisfaction.
- Auto Scaling for availability of EC2 Instances and availability of applications and deploying applications in Elastic load balancing and configured elastic load balancers (ELB) to distribute the traffic.
- Managing branching, merging, tagging in Git and other version control systems.
- Auto Scaling for availability of EC2 Instances and availability of applications and deploying applications in Elastic load balancing and configured elastic load balancers (ELB) to distribute the traffic.
- Worked in CI [Continuous Integration] environment like Provisioning the Infrastructure through IAC using Terraform and built them through Jenkins tool. Used the AWS Service - Code Commit to maintain my repository through GIT.
- Creating new AWS instances as per requirement through Infrastructure as code Terraform. Worked on various AWS services like EC2,S3 and Auto scaling as per the requirement.
- Used Cloud watch and enabled alarm notifications for the various components. Preparing monthly reports and runbooks documentation for the AWS resources. Good knowledge and understanding of service delivery, SLA and ability to prioritize the task.

Education

Karunya Institute of Technology and Sciences May 2016 – May 2020

B.Tech in Electronics and Communication Engineering : GPA - 8.12/10

Vignan Co-operative Jr college : 96.3

Sri Sai High School - Ponnekallu : 9.5 CGPA

Certifications

AWS - Solutions Architect Associate May - 2024

AWS - Certification [↗](#)

Publications

Double Balanced Mixer with noise reduction for RF Receiver using Cadence 180nm Technology
